

Every piece of **Twist & Turns™** furniture is handmade by highly skilled craftsmen, who are dedicated to uphold only the highest standards. After proper metal preparations, a zinc enriched primer is applied to the metal followed by a polyester powder coat finish. The result is an extremely durable finish that is both rust and fade resistant. Once the furniture is complete, each piece must pass a rigorous inspection to guarantee our stamp of excellence.

With a decade of experience and a reputation as a quality manufacturer, we feel our product is one that will be passed down for many generations to come.

Company History

Twist & Turns™ MFG. was founded in Roanoke, Virginia in 1992. Our main focus was, and is to this day to produce custom metal furniture that captures qualities that have been lost over time - durability and value.

Our strong family involvement and belief in the product have guided us to build furniture, which is as natural indoors as outdoors. Our family is involved in every aspect of the business from design and manufacturing, to management and sales. We are committed to providing top quality products, competitive pricing, innovative designs, and most importantly, personal service.
